ABOUT ME

Junior Frontend Developer with 1.5+ years of professional experience developing responsive web and cross-platform mobile applications using React.js, React Native, TypeScript, and Flutter. Experienced in production frontend modules, REST API integration, authentication, booking and payment workflows, and offline learning features. Contributed to live web, iOS, and Android applications, including iOS App Store releases.

SKILLS

Frontend: React.js, TypeScript/TSX, JavaScript, HTML, CSS, Tailwind CSS
Mobile: React Native, NativeWind, Flutter, Dart, iOS/iPadOS development
State & APIs: Zustand, TanStack Query, React Hooks, REST APIs, Axios, HTTP
Forms & Validation: Formik, Yup, React Hook Form, Zod
Tools: GitHub, VS Code, Android Studio, Xcode, TestFlight, App Store Connect, Postman

WORK EXPERIENCE

Binaryburst Solution, Bhaktapur **May 2025 – Present**
Junior Frontend Developer

Working as a Frontend Developer, collaborating with backend developers, UI/UX designers, QA, project manager, and DevOps team using GitHub for version control.

Pickncare - Healthcare Booking Web & Mobile Application

Tech Stack: React.js, TypeScript/TSX, Tailwind CSS, Formik, Yup, REST APIs, Flutter, Dart, Stripe, Apple In-App Purchase

- Developed major React.js frontend modules for a live healthcare booking platform, including authentication, dashboards, booking/request flow, pricing, profile management, and admin-side pages.
- Built responsive web UI and role/subscription-based logic for careseeker, caregiver, and admin users using React.js, TypeScript, Tailwind CSS, Formik, Yup, and REST APIs.
- Implemented frontend payment and subscription flows, including Stripe checkout redirection, card/bank payment UI, service payment, and plan selection.
- Built the Flutter/Dart frontend from initial setup, integrating REST APIs and Google/Apple Sign-In for caregiver and careseeker authentication and booking workflows.
- Integrated Stripe and Apple In-App Purchase flows; localized the app using Flutter localization for four languages and managed iOS App Store updates.

Real Estate Website / CRM Platform - Deployment Phase

Tech Stack: React.js, TypeScript/TSX, Tailwind CSS, TanStack Query, REST APIs, Formik, Yup

- Built landing/home pages for superadmin and agency sides, including a static superadmin homepage and a dynamic agency landing page connected with CRM data.
- Developed step-based property listing creation and editing, plus listing pages for Agency and Agent roles, with REST API integration.
- Collaborated on deal management pages for Agency and Agent roles; used TanStack Query and Formik/Yup for API data handling, form validation, and frontend state management.

Cryptica Digital Website

Tech Stack: React.js, TypeScript/TSX, Tailwind CSS, REST APIs

- Built static frontend UI for navbar and main website pages including Home, About, SME Package, Services, Blog, Pricing, FAQ, and Contact sections.
- Developed dynamic theme category and blog management features, including create and edit functionality.

CareKTM Student - React Native Mobile Application

Tech Stack: React Native, TypeScript, NativeWind, Zustand, TanStack Query, REST APIs

- Collaborated with the development team to build a cross-platform student learning app using React Native, TypeScript, and NativeWind.
- Integrated REST APIs with TanStack Query for student authentication, device registration, courses, learning materials, and profiles.
- Built offline material downloads and playback using React Native file-system tools and local storage, with learning progress tracked through Zustand.
- Managed iOS and iPadOS builds, testing, and App Store submission; Android APK is in student use while iOS review is pending.

Binaryburst Solution, Bhaktapur **February 2025 – April 2025**
Frontend Developer Intern

School Management System

Tech Stack: React.js, TypeScript/TSX, Tailwind CSS, React Query, Axios, Formik, Yup, React Router DOM

- Worked on frontend development for a School Management System focused on admin, teacher, and student workflows.
- Built reusable UI components such as dynamic tables, modals, forms, dropdowns, and searchable list layouts.
- Worked on role-based admin dashboard UI with permission-based navigation and protected frontend views.
- Gained practical experience in REST API integration, frontend architecture, GitHub workflow, Jira task tracking, and team collaboration.

PROJECTS

Academic Group Project (Team of 3) | 7th Semester

Vehicle Number Plate Detection

Tech Stack: Python, YOLO, CNN, Computer Vision, Anaconda, Image/Video Processing, Labeling Tools

- Developed a computer vision-based number plate detection prototype for Nepali embossed number plates using YOLO and CNN.
- Worked on image/video capture, dataset preparation, image labeling, YOLO model training, frontend UI, testing, and documentation.
- Detected number plate regions using bounding boxes and displayed extracted English plate text as part of the prototype.
- Gained practical exposure to object detection, dataset limitations, model testing, and AI-based system development.

CERTIFICATIONS

React Native Full Course | Cursa e-learning Platform **February 8 – 20, 2026**
Workload: 10 hours 01 minutes • View Certificate

EDUCATION

Asian College of Higher Studies, IOST, Tribhuvan University **2020 – 2025**
B.Sc. CSIT - Bachelor of Science in Computer Science and Information Technology

Uniglobe Secondary School / College, Nepal **2018 – 2020**
+2 Science
