ABOUT ME

Frontend Developer with 1+ year of experience building responsive, user-friendly web applications using React.js, TypeScript/TSX, and Tailwind CSS. Experienced in developing production-level frontend modules, integrating REST APIs, creating form-driven workflows, building role-based dashboards, and supporting live web and mobile applications. Strong focus on clean UI, reusable components, responsive layouts, authentication flows, booking systems, payment/subscription frontend flows, and frontend debugging.

SKILLS

Frontend: React.js, TypeScript/TSX, JavaScript, HTML, CSS, Tailwind CSS

Forms & API: Formik, Yup, REST APIs, Axios, TanStack Query, React Hooks

Mobile Exposure: Flutter basics, React Native basics, iOS/Android deployment support, Apple In-App Purchase support

Tools: GitHub, VS Code, Android Studio, Xcode, Postman

Other: Google/Apple Sign-In frontend flow, UI debugging, responsive UI development

WORK EXPERIENCE

Binaryburst Solution, Bhaktapur

May 2025 – Present

Junior Frontend Developer

Working as a Frontend Developer in a team of 3, collaborating with backend developers, UI/UX designers, QA, project manager, and DevOps team using GitHub for version control.

Pickncare - Healthcare Booking Web & Mobile Application

Tech Stack: React.js, TypeScript/TSX, Tailwind CSS, Formik, Yup, REST APIs, Flutter basics, Stripe frontend flow, Google Sign-In, Apple Sign-In, Apple In-App Purchase

- Developed major frontend modules for a live healthcare booking platform available on web, iOS, and Android, including authentication, dashboards, booking/request flow, pricing, profile management, and admin-side pages.
- Built responsive web UI and role/subscription-based frontend logic for careseeker, caregiver, and admin users using React.js, TypeScript/TSX, Tailwind CSS, Formik, Yup, and REST APIs.
- Implemented frontend payment and subscription flow including Stripe checkout redirection, card/bank payment option UI, service payment, and plan selection.
- Supported Flutter mobile app features including Apple In-App Purchase, receipt confirmation API flow, upgrade/downgrade handling, bug fixes, QA support, and iOS/Android release support.

Real Estate Website / CRM Platform - Ongoing

Tech Stack: React.js, TypeScript/TSX, Tailwind CSS, TanStack Query, REST APIs, Formik, Yup, React Native basics

- Built landing/home pages for superadmin and agency sides, including a static superadmin homepage and dynamic agency landing page connected with CRM data.
- Developed step-based listing creation and edit flow with structured form-driven UI.
- Used TanStack Query, REST APIs, and Formik/Yup for API data handling, form validation, and frontend state management.

Cryptica Digital Website

Tech Stack: React.js, TypeScript/TSX, Tailwind CSS, REST APIs

- Built static frontend UI for navbar and main website pages including Home, About, SME Package, Services, Blog, Pricing, FAQ, and Contact sections.
- Developed dynamic theme category and blog management features, including create and edit functionality.

School Management System

Tech Stack: React.js, TypeScript/TSX, Tailwind CSS, React Query, Axios, Formik, Yup, React Router DOM

- Worked on frontend development for a School Management System focused on admin, teacher, and student workflows.
- Built reusable UI components such as dynamic tables, modals, forms, dropdowns, and searchable list layouts.
- Worked on role-based admin dashboard UI with permission-based navigation and protected frontend views.
- Gained practical experience in REST API integration, frontend architecture, GitHub workflow, Jira task tracking, and team collaboration.

PROJECTS

Academic Group Project (Team of 3) | 7th Semester

Vehicle Number Plate Detection

Tech Stack: Python, YOLO, CNN, Computer Vision, Anaconda, Image/Video Processing, Labeling Tools

- Developed a computer vision-based number plate detection prototype for Nepali embossed number plates using YOLO and CNN.
- Worked on image/video capture, dataset preparation, image labeling, YOLO model training, frontend UI, testing, and documentation.
- Detected number plate regions using bounding boxes and displayed extracted English plate text as part of the prototype.
- Gained practical exposure to object detection, dataset limitations, model testing, and AI-based system development.

CERTIFICATIONS

Cursa e-learning Platform

February 8 – 20, 2026

React Native Full Course

Workload: 10 hours 01 minutes • [View Certificate](#)

EDUCATION

Asian College of Higher Studies, IOST, Tribhuvan University

2020 – 2025

B.Sc. CSIT - Bachelor of Science in Computer Science and Information Technology

Uniglobe Secondary School / College, Nepal

2018 – 2020

+2 Science
